Web Developer with professional experience at Qamsoft Technologies, specializing in building innovative and user-focused web solutions. Skilled in both front-end and back-end development, with a strong understanding of modern web technologies. Experienced in contributing to successful project completion through effective coding, testing, and collaboration. Holds a solid academic background in computer science, supporting strong problem-solving and analytical skills. Additionally skilled in graphic design, enabling visually appealing and functional interfaces. Passionate about continuous learning and eager to apply expertise to deliver impactful results in future roles.

EXPERIENCE

2025

WEB DEVELOPMENT, QAMSOFT TECHNOLOGIES

I worked as a Full Stack Web Developer at Qamsoft Technologies, where I developed and maintained dynamic web applications to enhance user experience and performance. I collaborated closely with design and backend teams to ensure seamless integration of user interfaces with server-side functionality. My role involved working with front-end and back-end technologies to build responsive, secure, and scalable solutions. I also participated in debugging, optimization, and deployment processes to deliver efficient and reliable web applications.

2023 – 2025

TEACHING QURAN, QUTOR

I worked as a Quran Tutor, teaching Quran recitation with proper Tajweed and helping students improve their pronunciation and fluency. I guided learners in Quran memorization using structured and effective teaching methods tailored to their individual abilities. I prepared customized lesson plans to support consistent progress and better understanding. I regularly assessed student performance and provided clear feedback to encourage improvement. I also created a respectful, supportive, and motivating learning environment to promote discipline and love for Quran learning.

EDUCATION

AUGUST 2024 TO AUGUST 2027

B.S. COMPUTER SCIENCE, UNIVERSITY OF CENTRAL PUNJAB

I have maintained a strong academic record while building a solid foundation in core subjects such as programming, data structures, database systems, web development, and software engineering. Throughout my studies, I have actively participated in academic projects and practical coursework that strengthened my problem-solving and analytical skills. My education

has equipped me with both theoretical knowledge and hands-on experience relevant to modern computing technologies.

SKILLS

- MS office(word,excel,powerpoint)
- Web Development
- Teaching Quran(online)
- Graphic Designing

ACTIVITIES

Designed and delivered small business websites and social media creatives using modern UI principles, managing the complete process from requirement gathering to final delivery. Developed responsive landing pages and reusable UI components to ensure consistent design and usability. Focused on optimizing websites for performance, accessibility, and cross-device compatibility.

Supported digital outreach initiatives by creating simple marketing content and assisting with regular website updates. Collaborated with stakeholders to gather feedback and refine content. Ensured accuracy, clarity, and consistent brand presentation across all digital platforms.
